The advent of COVID-19 in 2020 caused a pandemic that shook the entire world. Business and human interaction halted and many unfortunately lost a family member or loved one to the virus. Thankfully, scientists have developed COVID-19 vaccines to provide the human body with acquired immunity against the virus.

The National Primary Health Care Development Agency (NPHCDA) is leading efforts of The Federal Government of Nigeria to provide safe, effective and efficacious COVID-19 vaccines. We at The Zeebah Foundation urge parents of all our clients to avail themselves at the allocated COVID-19 vaccine collection Centres/hospitals for vaccination.

Please do NOT accept vaccines from unknown sources.

World Autism Awareness Day

April 2nd remains the internationally recognized Day set aside to raise awareness about individuals with autism through out the world.

World Autism Day is only one of the seven official health-specific UN days. The day itself brings individuals, groups and organizations, together to research, diagnose, treat and create awareness for those affected by and living with autism.

The theme for this year is **inclusion in the Work Place: Challenges and Opportunities in a Post-Pandemic World.**
